

Diagram Documentation

Server Database - Schema Version 20

Please bump the version by 1, any time the schema changes.

Also, include the migration plan under app/database/migration/server, update all models, relationships and types.

Lastly, export all PNGs, SVGs, etc under the source project (./docs/database)

If you have any question/queries that you would like to clarify, please reach out to the Mobile Platform Team.

Category

Field	Description	Type	Default	Other
id	server-generated	string		PK
collapsed		bool		
display_name		string		
muted		bool		
sort_order		number		
sorting	alpha, recent, manual	string		
team_id		string		FK, INDEX
type	'channels' 'direct_messages' 'favorites' 'custom'	string		

CategoryChannel

Field	Description	Type	Default	Other
id	composition ID Team.id_Channel.id	string		PK
category_id		string		FK, INDEX
channel_id		string		FK, INDEX
sort_order		number		

Channel

Field	Description	Type	Default	Other
id	server-generated	string		PK, FK
create_at		string		
creator_id		string		FK, INDEX
delete_at		number		
display_name		string		
is_group_constrained		bool		
name		string		INDEX
shared		bool		
team_id		string		FK, INDEX
type		string		

Field	Description	Type	Default	Other
update_at		number		
banner_info		string		
abac_policy_enforced		boolean		
autotranslation		boolean		

ChannelInfo

Field	Description	Type	Default	Other
id	same value as Channel.id	string		PK, FK
guest_count		number		
header		string		
member_count		number		
pinned_post_count		number		
files_count		number		
purpose		string		

ChannelMembership

Field	Description	Type	Default	Other
id	composition ID Channel.id-User.id	string		PK
channel_id		string		FK, INDEX
user_id		string		FK, INDEX
scheme_admin		bool		

CustomEmoji

Field	Description	Type	Default	Other
id	auto-generated	string		PK
name		string		

CustomProfileField

Field	Description	Type	Default	Other
id	server-generated	string		PK
group_id		string		
name		string		
type		string		
target_id		string		
target_type		string		
create_at		number		
update_at		number		

Field	Description	Type	Default	Other
delete_at		number		
attrs	stringified JSON	string		NULLABLE

CustomProfileAttribute

Field	Description	Type	Default	Other
id	composition ID User.id- CustomProfileField.id	string		PK
field_id		string		FK, INDEX
user_id		string		FK, INDEX
value		string		

Draft

Field	Description	Type	Default	Other
id	auto-generated	string		PK
channel_id		string		FK, INDEX
files	stringify (array)	string		
message		string		
root_id		string		FK, NULLABLE, INDEX
type		string		NULLABLE

ScheduledPost

Field	Description	Type	Default	Other
id	auto-generated	string		PK
channel_id		string		FK, INDEX
files	stringify (array)	string		
message		string		
root_id		string		FK, NULLABLE, INDEX
metadata		string		NULLABLE
create_at		number		
update_at		number		
scheduled_at		number		
processed_at		number		NULLABLE
error_code		string		
type		string		NULLABLE
